Dear Mrs BR Keller-Sutter

We write you in regards to one of our employees Jost Walter Odermatt | 04.01.1980 | Buochs NW which was this year rather frequently exposed under random circumstances beyond our control to police brutality and police arbitrariness in Lucerne, Switzerland.

We like to remind you, of his birth given role to fight back against the cabal. Jost is in our opinion one of the few truly protectors of water (and yes in the endgame water protects water as we all know!) but he will be of immense importance to protect the fountain of youth against technocrats like Larry Ellison (Oracle Corp, NASD:ORCL) and Elon Musk (Muppet of Larry!).

So we advise you, let him alone from now on and do his duty. Jost is strongly committed to to our founders principles of 1291 and NOT 1848, please respect his Swiss native roots and given role.

Proofs attached.
